Cricket Pitch Protection

Stuart Canvas are the pioneers of sports cover manufacturing. We have been making covers for the cricket, tennis and racing industries for over 30 years and in that time have developed some of the leading designs currently used across all sports.

Hover Cover

The Hover Cover is an innovative product designed by Stuart Canvas that has revolutionised the way major cricket grounds protect their squares and pitches. Developed in 1998 and installed at Lords in that same year it not only reduces the amount of playing time lost to rain, but also enables the ground staff to cover the pitch and square within three minutes with reduced manpower.

Mobiles & Flat Sheets

Stuart Canvas have supplied mobile pitch covers and flat sheet pitch covers to many of the countries Test & County grounds as well as many smaller clubs.

Our original mobile pitch cover design has been modified and improved over the years, taking into account suggestions from club and county groundsmen.

Our mobile pitch covers are supplied in three sections giving a total coverage of 75' x 12'. The frame is made from mild steel and has an integral gutter system. The cover tops are manufactured from U.V. Stabilised P.V.C. and each cover is extended to create an overlap between sections. Four wheels are fixed to each section, two swivel and two fixed. The system also provides an excellent opportunity for advertising

Stuart Canvas manufacture flat pitch covers in four grades of cloth, Pro Tech, Test, County Mark 2 & Club grade. Our range of covers offers you the best protection from the inclement weather while giving you the choice to fit within your budget. Our flat sheet pitch covers can be made to act as Side Sheets, which can be attached to any set of Mobile Pitch Covers, or to stand alone as Flat Sheet Pitch Covers.

Stuart Canvas Products is very proud to be an official supporter of ECB CricketForce (www.ecb.co.uk/cricketforce). CricketForce is a powerful club Cricket Programme which SCP fully supports.
